

The Ice Rescue Systems Pro Series Throw Bag is an excellent choice for law enforcement, fire service or SAR involved in Ice, Swiftwater or Flood rescue where accuracy and smooth deployment are paramount

**Used by
Professionals
Around the
World**

FEATURES:

- + Made of highly visible durable **600 denier pack cloth**, IRS throws quickly as our **1" quick connect** is slightly bent which offers a more powerful and accurate throw.
- + **USCG approved** internal flotation and floating rescue rope keeps our rescue bags on top of the water where it's needed.
- + Easy to reload, diameter of bag offers perfect hand size for repacking.
- + Meets **NFPA 1983/2012 Edition** for throw ropes.
- + The IRS throw bag offers light and whistle attachment points for night applications.
- + **Barrel lock drawstring** incorporated in a flared nylon top for smoother throws, plus easy reloading and closure.

Rope knots reduce tensile strength. For this reason, we make no claims regarding a rescue bag's/rope strength. Maximum Break Strengths load indicated is for the rope alone with no knots added.

ACCESSORIES:

- + Ice Awl Attachment
- + Light Stick - Flashlight - Road Markers
- + Whistle
